

Remarks

In the outstanding Official Action, the Examiner:

(1) rejected claim 1 on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 16 and 18-25 of U.S. Patent No. 6,675,032; and

(2) rejected claim 1 on the ground on nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,690,960.

In response to Items 1 and 2 above, Applicants have amended claim 1 in order to distinguish the present invention from the inventions of U.S. Patent Nos. 6,675,032 and 6,690,960. Applicants believe that this amendment is sufficient to overcome the obviousness-type double patenting rejections which are based on U.S. Patent Nos. 6,675,032 and 6,690,960.

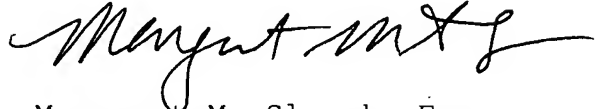

More particularly, Applicants have amended claim 1 to add an additional element to the video-based surgical targeting system so that it now comprises at least one virtual graft for insertion into the 2-D images contained in the patient specific database and/or the 3-D computer model.

Accordingly, claim 1 is believed to be in condition for allowance, and allowance thereof is respectfully requested.

In the event that any fees may be required in this matter,  
please charge the same to Deposit Account No. 16-0221.

Thank you.

Respectfully submitted,

Margaret M. Slezak, Esq.
